

Behind the Scenes

How Noor AI works

A natural-language processing workflow

01
Receive the
message

02
Detect and
translate

03
Understand
and extract

"Behind Noor AI is a natural-language processing workflow. Let's walk through it."

04
Pick the next
question

05
Flag, don't guess

06
Noor decides

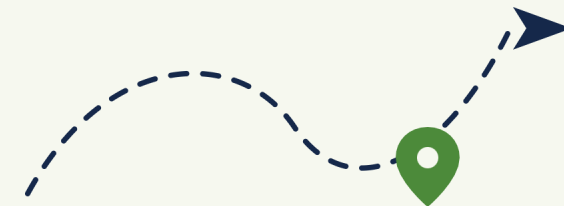

Rasyid

Step 1 · Listen

Receive and detect the language

Translate first, only if needed

VISITOR WRITES

"Die Farm war fantastisch, aber der Eingang war schwer zu finden."

READY TO PROCESS

"The farm was amazing, but the entrance was difficult to find."

"First, Noor AI receives the visitor's message and works out which language it's in."

Fina

Step 2 · Understand

From a sentence to structured insight

Identify the intent, extract what's useful

VISITOR'S WORDS

"The farm was **amazing**,
but the **entrance** was
difficult to find."

STRUCTURED FEEDBACK

Overall sentiment

Positive

Location experience

Poor

Issue detected

Signage or directions

"One casual sentence
becomes clear data Noor
can act on: what went
well, and what to fix."

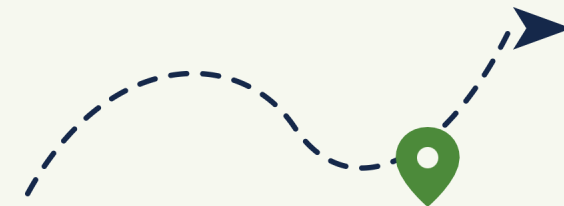

Sai

Step 3 · Ask

Pick the next best question

From Noor's question bank, not every question

NOOR'S QUESTION BANK

How did you hear about the farm?

Was the booking reply quick enough?

Where did you lose your way: main road, village turn or farm gate?

How were the toilets and shade?

Was the coffee good value for money?

Shorter

Only questions that matter

Personal

Follows what the visitor said

"They mentioned the entrance, so Noor AI asks about directions next, and skips the rest."

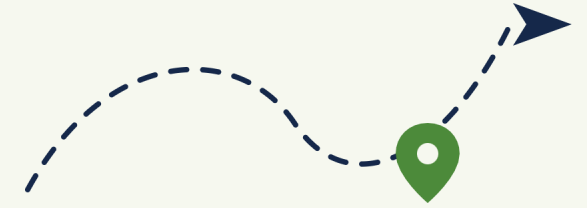

Rasyid

Step 4 · Check

Unsure? Flag it, don't guess

Honest uncertainty beats a wrong answer

CLEAR REPLY

"The coffee tasting was the best part!"

✓ **Confident, so it's saved**

Highlight: coffee tasting

UNCLEAR REPLY

"It was okay, but that thing near the house..."

⚠ **Uncertain, so it's flagged**

Kept word-for-word for Noor to read

"When Noor AI isn't sure what a visitor meant, it raises a flag instead of making something up."

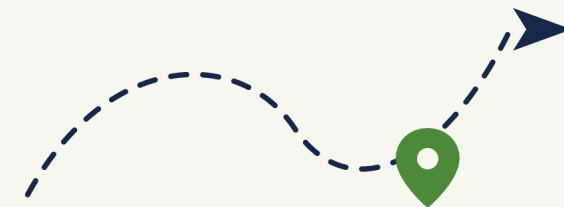

Fina

Step 5 · Decide

AI organizes. Noor decides.

A human always makes the final call

Noor AI organizes

Top issue

Signage

Top highlight

Coffee tasting

Flagged

1 unclear reply

SMS TO NOOR

Visitors say the entrance is hard to find. Add a road sign?
1 = Yes · 2 = Later

1

Sent in Noor's language

"The AI sorts and summarizes. Noor knows her farm, so she makes the final decision."

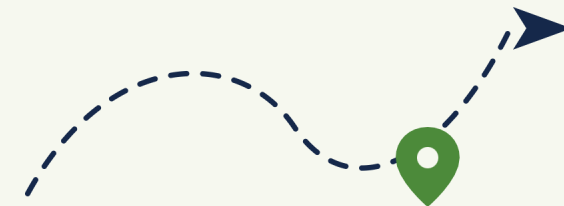

Sai

Putting It Together

Three ideas, **one simple tool**

Noor AI, built for people like Noor

Small AI

Focused on one job:
understanding
visitor feedback

Human oversight

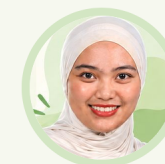

Flags doubts, and
Noor makes the call

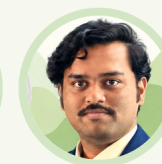

Practical feedback

Real fixes for a real
tourism business

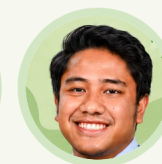

"That's how Noor AI
brings small AI, human
oversight and practical
feedback into one
simple tool."

Fina
